Indian Valley Industries, Inc.

Technical Data Sheet

IVI Coir Logs/Bio Fiber Rolls
Log Length - 20 LF (6m)

IVI Coir Logs are natural, environmentally compatible bioengineering solutions for stream and lakeshore erosion protection and slope stabilization. Made of 100% coir encased in a 2"x2" coir netting, Coir Logs are the industry's only machine-made logs, insuring a consistency found in no other product of their type.

Supplied in dimensions listed below, IVI Coir Logs provide the user an opportunity to select the coir log, which meets their application requirements in the most cost effective manner. Easily installed using no special equipment, Coir Logs help create a growth environment for plant materials in which vegetation can be restored and fragile eco-systems are protected.

PRODUCT TEST DATA	
12-inch Diameter Roll (305mm)	
Weight	6.3 lbs/ft or 9.4 kg/lm
Density	7.5 lbs/cubic foot or 120 kg/cubic meter
16-inch Diameter Roll (406mm)	
Weight	11.0 lbs/ft or 16.3 kg/lm
Density	7.5 lbs/cubic foot or 120 kg/cubic meter
20-inch Diameter Roll (508mm)	
Weight	16.9 lbs/ft or 25.1 kg/lm
Density	7.5 lbs/cubic foot or 120 kg/cubic meter
Test results represent Minimum Average Roll Values (MARV) with the exception of weight which is a typical result.
